Report of Choir Concert

The Choir Concert of last Monday night was a thorough success and much enjoyed by the enthusiastic audience present. Space will not permit a detailed description of the program. But special mention should be made of Mrs. Crocker who sang "There's a Land" in a very creditable manner, also Mrs. W. Laut whose singing of "Just That One Hour" was well rendered. Little Jessie Arlidge sang "Little Bisque Doll" quite dramatically, also the encore "Three Little Chestnuts". It is rare to hear one so young sing so well. Very amusing "Sermon" readings were given by Mrs. McLean on "Walking Circumstantially" and Mr. A. L. Nicholson on "Old Mother Hubbard". An unusual feature of the program were the Saxophone Solos by Mr. J. S. Jose. The Male Chorus "Kentucky Home", one verse of which was sung in the porch, another on the march and the third on the platform, was novel and well received. The Ladies Chorus, the Male Chorus and the combined-Chorus "The Lost Chord" all showed great improvement over the concert earlier in the season and brought forth favorable comment from Mr. Evans, manager of the Chautauqua circuit who was present, and from others as well. Mrs. R. T. Amery gave fine support as accompanist, while Mr. A. Arlidge may well feel pleased with his training as Leader.

Celebration at Union Church

The Rev. J. P. Berry stated some interesting facts regarding the early ministers of Crossfield; at the congregational social and celebration last Friday night at the Union Church. Rev. Mr. Wood, was the first Methodist pastor 1902-1. His circuit covered a large territory including Didsbury, Cartairs, Crossfield and Airdrie. He was drowned in Kne Hill Creek in May, 1902. Mention was made of Rev. Walter Douglas Ramsey the Presbyterian minister 1902-3 and enqury has elicited the information that he preached for a time in McCool's store where the Chinese laundry is now located. Different Methodist ministers mentioned were Revs. W. E. S. James, of Cartairs and Crossfield; —Whatman of Crossfield and Airdrie; R. W. Dalgleish, of Cartairs, Crossfield and Airdrie; F. J. Johnson, during whose pastorate the Church was built; J. H. Johnson, when the parsonage was built; and W. A. Smith who co-operation took place. Rev. Mr. McNeil, brother of the famous Scottish Minister, was the first Presbyterian minister prior to co-operation. Mr. Berry spoke in terms of appreciation of the removal of the debt from the church property and size of the splendid reports given by the various organizations. The Pastor took the chair, Mr. Honeysett reported for the Crossfield Young People's Society, Mr. Willis for the Choir, Mr. Walcock for the Sunday School and John Becker for the Trail Rangers. Representatives present from Beaver Dam were Mr. and Mrs. VanDolinder, from Inverlie Mrs. Greenwood and Mrs. Becker, and from McNeilly Mission, Mrs. Laut and G. Trevor Jones. At the request of Mrs. Greenwood the Pastor read the report of Inverlie Ladies' Aid, which showed a membership of 16, and 10 meetings held during the year, with \$70.00 contributed to the Church and \$10.00 to the Sunday School. Mr. W. McTitory, Secy. Treas. of the circuit presented a report of the finances showing a fairly satisfactory condition with the need of further support in order to meet our obligations.

The program was varied with concert solo by Mr. Goodsell, a reading by Mr. Nicholson, vocal solo by Mr. Honeysett, violin solo by Mr. Golden, vocal solo by Mr. Walcock, piano solo by Mrs. N. Van Dolinder, which received exceptional appreciation. Mr. G. Trevor Jones as a representative from Rychnok spoke for his district. Mr. A. Jessiman, the treasurer of the Ladies' Aid, presented a fine report for that institution, showing nearly \$600 raised during the year. Special interest centered around the burning of the notes, symbolizing the removal of the debt. The President of the Ladies' Aid Mrs. McTitory, the present

Office

Pastor Rev. R. K. Swenerion, and a former Pastor Rev. J. P. Berry stood upon the platform while Alice Biles and Helen Swenerion marched forward carrying the papers on a silver platter. Mrs. McTitory took the papers, the Pastor touched a match to them and while they burned the congregation thankfully joined in singing "Praise God From Whom all Blessings Flow." A very successful and important evening was brought to a close with refreshments served by the Ladies' Aid.

It was regretted that Rev. W. A. Smith found it impossible to be present owing to unexpected claims upon his time connection with his position as president of the conference.

For Sale

For Sale.—Horses, Agricultural and Heavy Draft, from 1400 to 1900 lbs. Majestic, 4 year old, 1 Child. Four year old gelding. Would trade 400 lbs and go to cattle, also some Rhode Island Red Cockrels, some Shorthorn Yearling Bulls. Apply D. J. Miller, Phone 1204.

A limited number of Young well bred shorthorn bulls here to commence lambing 1st May. Chas. Holtgren.

CROSSFIELD, Alberta.

TO ASSIST THE FARMERS BY PLACING SETTLERS ON UNOCCUPIED LANDS

Managing Director of the Western Canada Colonization Association Discloses the Plans of the Organization.—Major-General A. D. McRae, C.B., Immigration Expert, Asks For Provincial Land Settlement Board and for Stabilized Lists of Vacant Lands With Prices Good For a Reasonable Period.

As Mr. T. A. Crear has said, "population is the only possible solution of the national railway problem." The simple fact is that the Western Canada nor Canada as a whole can continue to "carry on" without a marked increase in the number of people on the prairies. The present proportion of the three great provinces inflicts an unnecessary burden upon the settlers themselves, as it does upon the entire country. The larger the number of settlers there are on the soil, the more content will their minds be in regard to such questions as freights, elevating marketing, and purchasing.

A number of far-seeing men have brought the Western Canada Colonization Association into being. The organization has no share capital. Under its federal charter, it can receive no profits. It is financed by voluntary subscriptions from public-spirited citizens who have the progress and welfare of the country at heart. Its Board of Directors is made up of representative farmers and business men. Its purpose is to bring under production the unoccupied lands lying close to existing railways in the main by absorption or otherwise.

Major-General A. D. McRae, C.B., who was recently appointed managing director of the association, is an experienced colonization expert and in the plan drawn up by him the heartiest co-operation on the part of the prairie province governments is essential to the success of the project. He has been in touch with the provincial administrations and they have appointed a Land Settlement Board to provide the association with a fixed list of unoccupied lands at prices good for reasonable periods. In his opinion little can be made with the difficult task of colonizing the west unless this request is complied with. He refuses to believe that the one and only way to success is to forego his share of the prospective benefits to be derived from the great fund raised by the Western Canada Colonization Association.

During the last few days a delegation including Major-General McRae, Mr. M. A. Brown, of Medicine Hat, Vice-President; and other Directors of the Association, has waited upon the premiers of Saskatchewan and Alberta cabinets with a memorial setting forth the suggestions of the organization. In each case the delegation was received by the premier and his colleagues. The memorial presented read as follows:

To the Honourable Mr. Premier and Ministers of the Council: I thank you on behalf of the Directors of the Western Canada Colonization Association for this opportunity of meeting with you to consider the question of colonizing lands in your province.

Before proceeding, I would like to state the mission of our association. Our organization is sustained entirely by voluntary subscriptions from prominent Canadian individuals and corporations. Business interests in Eastern and Western Canada, as well as those of our associates whose only aim is to assist in settling the unoccupied lands of Western Canada. This fact reveals a national realization of the urgent need for increased immigration to the land. Our undertaking, in its very nature discloses an active sympathy with the people of the prairie provinces and their whole object, as will be hereafter shown, is to better their economic position together with that of the whole Dominion.

The Settlement Required.

I seriously believe that the success of our efforts to assist in the settlement of the unoccupied land in this province largely depends upon being able to co-operate with and work through a properly constituted and effective provincial agency. We therefore desire to submit to your consideration the following legislation as in our judgment the minimum that will meet the situation and facilitate our endeavors for the public welfare.

(a) Establish a Provincial Land Settlement Board consisting of one director who will be responsible to and under the direction of the minister of agriculture.

(b) Require the owners of unoccupied land, upon receipt of notice, to, within a given time, with their Land Settlement Board, place their own unoccupied lands in trust together with terms thereon, such sale (conditional upon the land still remaining unoccupied) to hold good for a period of two years or thereafter, as the board may determine, if no provision is made to allow the owner one year's interest at six per cent. valuation and a refund of taxes paid in case he fails to make after the expiration of the two years.

(c) Make such valuation the basis for the unoccupied land tax.

(d) Authorize the Land Settlement Board to appoint a duly authorized agent in the locality of his land, to whom the same may be referred to require such owner to authorize such agent to effect sale on his behalf at the price and the terms fixed with the Land Settlement Board.

Work for the Land Board.

The foregoing recommendations are only what we regard as necessary to enable us to go forward successfully

manner in which this responsibility is discharged.

Uniform System Needed.

With the disappearance of the free homestead, the situation becomes a difficult affair. So long as settlers could rush into the country and with the assistance of the local Dominion Land Agent find, within reasonable time, a place near a railway, little attention was paid to them. The whole situation is now changed. Most of the land has been alienated from the crown. The undeveloped land is held largely by speculators. Some uniform method of dealing with such lands must be adopted, or they will not be available in a permanent and practical way for incoming settlers.

A Fixed Price List Necessary.

The present haphazard method of listing lands for sale, with the probability that the owner may change his mind, makes it difficult for the purchaser to make a purchase, makes it quite impossible for any private agency to undertake colonization in a big way.

Spare Settlement Costly.

We have in mind the burden which the unoccupied lands will bring to the lack of proper direction of settlements, a plan including a system of maps and price lists holding good long enough for negotiations with prospective settlers, so that such settlers may come to look over the land and close the deal before the price is jumped on them.

We feel that the efforts of individuals or corporations to accomplish this large task will be fruitless.

In our judgment neither of them can compile for sale lists of unoccupied lands aggregating an acreage sufficient to justify the expense, with a permanent price list which will be acceptable to the market.

We are going to make satisfactory progress with the settlement of our unoccupied lands we must put the sale of such lands on a permanent basis, so that all the settlers will offer them a congenial social environment.

With the active mediation through

of the drift of immigration which comes along "on its own" may be properly looked after.

Social Service for the Board.

The Land Settlement Board should

be able to achieve an invaluable service to the province by directing the new settlers in a general way into districts where their former agricultural experience is most likely to be of value.

It will direct the newcomers in as a result of the Dominion Government's efforts.

It will afford sheltered homes which

will be available to the new settlers.

It will give the new settlers a chance to

work in the transfer of settlers within the province.

In addition to dealing with the land

commissions directly under the board

and Provincial Settlement Board will have a very powerful indirect influence on agricultural development throughout the province generally and will be safeguarded in preventing settlers from buying unaffordable high prices for wild land.

The operations of the board cannot act otherwise

than as a stimulus to the sale of unoccupied land.

It will result in bringing a big increased acreage under permanent production and incidentally in lessening the burden of taxation on the existing population.

An Established Principle.

The proposed legislation making

the owner of unoccupied land liable

to pay a tax on his land, will be

render feasible the early issue of maps and price lists of unoccupied lands in the province.

With such fixed lists no adequate land settlement can be secured.

Given the opportunity to co-operate

with and operate through an effective

Land Settlement Board; given the

resident owner or the responsible

land agent; supplied with litera-

ture, maps and permanent price lists

of the western Canadian Colonization Asso-

ciation, a great number of the right kind of farmer settlers.

Respectfully submitted,

(Signed) A. D. McRae,

Managing Director.

Japanese General Suicide.

Tokio.—Lt.-Gen. Saito, command-

in-chief of the 11th Japanese division

at Vladivostok, has committed suicide,

his death being a sequel to the shoot-

ing of United States Lieut. W. H.

Langdon in that city early in January.

Naval Sealing Deferred.

Ottawa.—The date for the sealing

of the Canadian squadron has been

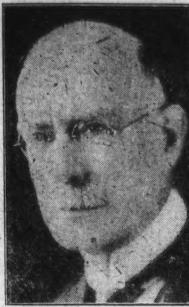

put back one week.

The department of naval service announces that the

squadron will leave Esquimalt for eastern

waters on May 27.

Saskatchewan's Lieut.-Governor

His Honor, Lieutenant-Governor H. W. Newlands, newly-appointed Lieutenant-Governor of Saskatchewan, was an successor to Sir Richard Lake.

with you. Once the Land Settlement Board has been established and its usefulness demonstrated, undoubtedly wide powers will be granted to it.

The board will deal with all immigration problems in and for the provinces through which you will carry on your provincial immigration efforts; it will also direct the immigration of other settlers to the door of the prospective settler. With such considerations in view we are anxious that your province should not (through failure to act) remain within the restrictions and obligations imposed upon them by the railway law, for one would be only too glad to do all he could to assist, Mr. Carvell said.

Strong Plea for West at Railway Board Session

Emergency Relief Is Asked For at the Earliest Date Possible.

on the detail work of the proposed Land Settlement Board, the province must also expect to bear the expense of getting out maps and price lists of lands and to pay the expenses of a lecture to accompany same. All of this is constructive work and will be found very advantageous to the province.

Other Activities.

Moreover, the association is to benefit, as it should, from the efforts of the Dominion Government and of voluntary associations such as the one I am permitted to direct, you should have two or three foreign offices, in connection with these offices, particularly in the United States, the value of attending during the years fifteen to twenty American fall wheat has been established.

We anticipate that our work in the United States and Great Britain develops opportunities will be offered to the western provinces to co-operate with other provinces in "carrying on" to carry on lecture work during the winter months.

You also wish to join in making other similar arrangements with the railroads to Canada to the door of the prospective settler.

With such considerations in view we are anxious that your province should not (through failure to act) remain within the restrictions and obligations imposed upon them by the railway law, for one would be only too glad to do all he could to assist, Mr. Carvell said.

Will Benefit Present Farmers of the West.

The outstanding need of the west is more people on the land. Falling freight rates, high prices for land, a hopelessly sparse population must continue to bring an undue burden of municipal, provincial and federal taxation. Under these circumstances government can scarcely afford to pursue a policy of inaction regarding immigration.

In helping to establish a satisfactory organization for becoming settled, this association is working and will work inevitably in the interests of those already on the land. It goes without saying that questions relating to water rights, irrigation, elevating land and purchasing growth in agriculture.

To put it in another way this association can enter into a partnership with the various provincial governments by such means that the exodus of farmers from various districts can be stopped and the agricultural population be given the security of tenure which is essential to the continued growth and welfare of the country.

Internal Migration.

Furthermore, it would appear that the Land Settlement Board, with the information it will possess, will offer an invaluable service to the new settlers in a general way into districts where their former agricultural experience is most likely to be of value.

Under these circumstances the natural consequence of the westward movement will necessarily command the support of the organization.

The colonization efforts outlined will need to be carried on in conjunction with the provincial governments.

In view of the fact that the unoccupied lands in the province are now offered for sale at a price which will be safeguarded in preventing settlers from buying unaffordable high prices for wild land.

The operations of the board cannot act otherwise than as a stimulus to the sale of unoccupied land.

It will result in bringing a big increased acreage under permanent production and incidentally in lessening the burden of taxation on the existing population.

A Great Opportunity.

The day for big private colonization schemes is over. Left to himself the small colonizer finds the effort required to get the land under cultivation is too uncertain. The area of the prairie provinces is so tremendous, the railways and their branch lines are so scattered that a general scheme is not practicable if incoming settlers are to be located within reasonable distances of existing transportation facilities. Any successful colonization plan must be based on the individual settlers.

Given the opportunity to co-operate with and operate through an effective Land Settlement Board; given the resident owner or the responsible land agent; supplied with literature, maps and permanent price lists of the western Canadian Colonization Association, a great number of the right kind of farmer settlers.

Western Canada Is Attracting Great Numbers Of Settlers From U. S.

Nearly fifty thousand emigrants came from the United States to Canada in the year 1920 to make permanent homes in the Dominion. Practically all of them, it is estimated, were experienced agriculturists who either acquired free government homesteads or purchased improved farms. Whilst this very desirable contribution to Canada's man power, deposited in the manner to best serve Canada's need, is only about one-third of that of the years prior to the war, it is estimated authoritatively that the Dominion received last year, and during the war years, as many farmers from the United States as she was wont to welcome, and that the classes whose emigration fell off due to war conditions were the industrial, the speculative and others not directly producers. It must also be borne in mind that would-be entrants at the border are sifted as carefully as to certain ports, and that in the existing internal conditions, in some months, as many applicants at border towns were rejected for Canadian citizenship as were accepted.

Gratifying as was 1920's emigration of farmers' from the United States, greater attention was drawn in that year to the augury of the 1921 exodus as evidenced in the more general interest taken in Canadian lands and agricultural affairs, the harvest of which will be reaped this year and years to come. Whilst large numbers of farmers came to settle with their families on western farm lands, there was an infinitely greater number of scouts who, for themselves or others, came to look over the situation, judge as to locality, pick out the land, and perhaps purchase, and then return to their homes to clear up their affairs before making the final move and settling in the newly chosen homes.

During the summer, under the auspices of the Dominion Government, special trains carrying American editors and business men toured the Canadian West, the trips being to many a revelation. They were surprised and delighted. They became boosters for the country. Many could not withstand investing in the assured future of the country. The consensus of opinion among these men, all representative of thickly settled agricultural districts and in close touch with the economic conditions pertaining to them, was that one hundred thousand Americans would settle in Western Canada during the present year. A great wave of immigration, they felt, was inevitable, and this the first tide of the early spring would seem to justify.

American farmers come up to Canada as it is borne upon them that fine crops are raised upon the low-priced lands of Canada as upon their own highly held holdings. They see Canadian farmers carrying off the world's premier honors in wheat and oats and successfully competing in cost against the recognized corn belt.

They want to expand and settle holdings for themselves or growing families, buy a development, manageable in their own localities.

The prevailing exchange situation has been decidedly advantageous to United States farmers purchasing in Canada, and instances have come to light where the entire proceeding of acquiring a new Canadian farm has been transacted on the difference in the exchange of money, the farmer, at the conclusion of the deal, being in possession of land of possibly greater acreage and the sum of money for which he sold his United States property intact.

Many American purchasers of improved farms have discovered a gratifying feature in the high productivity of cheap Canadian land in the fact that a farm may pay for itself in a single year, returning from the proceeds of the first harvest a revenue in excess of the purchase price of the farm.

United States farmers are being attracted to Canadian farms in increasing numbers yearly, and even the upheaval which the war brought

about did not interfere with this category of the United States exodus. In the first seven months of 1920, nearly 7,000 United States farmers took free government homesteads in the Western Canadian provinces, whilst thousands of others purchased cheap, privately held lands or improved farms. Canada's magnificent crop and her numerous international agricultural successes are going to attract more this year, whilst a sure forecast of what Western Canada has to expect from across the border this year and for years to come, is contained in the tremendous interest exhibited by United States farmers and others throughout the whole of last year.

Electric Method To Increase Grain Yield

Southern Alberta Farmers Adopt New Method of Treating Seed Grain

Seed treated by a new process of seed electrification, a method which, it is claimed, will increase the yield, check the spread of fungoid diseases and improve the quality, will be sown this year by many of the leading farmers in Southern Alberta. A plant for the treating of seed has been established and already its capacity is taxed to such an extent that an enlargement will be made immediately.

Great claims are made as to the advantages of this system which is known as the Wulfray Electro-Chemical process of seed electrification. The process consists in placing the seed to be treated in a bath containing a suitable metallic salt such as calcium or sodium chloride and weakly electrifying the same for a length of time appropriate to the seed under treatment. The solution is then run off, and the seed taken out and dried. The object of the salt is not only to decrease the resistance, or, in other words, to increase the conductivity of the seed coat, but to maintain that conductivity during the period of germination. Calcium and sodium in correct proportions are, however, plant foods and assist in the after stimulation of root production.

This method is a new one to Canada, but it has been tried with remarkable success in England.

Advocate Widening Saskatchewan River

At An Estimated Cost of Twenty Millions River Could Be Made Navigable.

Hon. J. L. Cote, provincial secretary and minister of mines for Alberta, read a statement in the Ottawa Herald regarding the local situation in his province. The key to the marketing situation, he said, was the widening of the Saskatchewan River.

The public works department had made a survey of this project and it was estimated by spending \$20,000,000 a channel six feet by 150 feet could be effected between Edmonton and Winnipeg. The reduction in freight would be from the present \$1.60 per mile on 11-2 miles.

Checking the waters in the mountains would be contingent to the scheme and power could be generated, thus lessening the cost.

Timber of Nova Scotia.

The timber tracts of Nova Scotia still continue to be one of the biggest revenue producers for the province. In 1920, the total cut was about 350,000,000 feet, possessing a value as raw material of \$2,250,000. But this by no means covers the full value to the province and from the best sources of information obtainable it is estimated that the value of timber produced during the past year was in the neighborhood of \$2,810,000.

Among after-the-war bargains offered by the British Government are 17 airplane stations, 9,000 barracks and 5,000 tons of chicken broths.

Motive Power Expert

R. A. Pyne, Superintendent of Motive Power and Car Department, Canadian Pacific Railway Western Lines.

"Sprouting" Potatoes Adds To Yield

Given Start Before Planting Tubes Will Develop More Quickly.

By "sprouting" potatoes it is possible to add eight-eight bushels per acre to the yield, this result having been obtained with Irish Cobblers last year. Sprouting is a common practice in Ireland, and consists of medium sized tubers selected before they have sprouted to any extent in the cellar, and either placed in shallow boxes or trays, preferably with the seed end up, and stored shallow on the floor of a room where there is a bright light. Either method will give almost equally good results. At first the temperature should be cool enough to prevent sprouting. The skin will soon turn green and become rather tough. The temperature is now raised enough for the tuber to sprout, and when treated as described two or three days later the sprouts will develop from the seed end, the other eyes remaining dormant. Growth will thus be concentrated in these few shoots and, as a rule, there will be a larger proportion of marketable potatoes where there are a few good shoots than where there are many. If the potatoes are given plenty of light and the place where they are kept is fairly cool, the sprouts will become very sturdy, and strongly attached to the tuber, will be green in color, and will not be broken off in handling, unless very carelessly used. Thus given a start before planting, they will usually come along rapidly and tubers will develop more quickly from sprouts which have grown slowly in a bright, cool place than from sprouts which have grown in a dark place, the latter, moreover, usually breaking off at the time of planting. Sprouts should be about two inches in length at the time of planting.

The warmest and best drained soil that is available should be used for extra early potatoes, says Dr. W. T. MacLean, Dominion Horticulturist, and the sets should be planted shallow, so that the tubers do not touch the soil, they will get the advantage of the heat from the surface soil. In Great Britain, the potatoes are planted when whole when sprouted, growth being more vigorous when this method is followed, but this is not necessary in order to get an increase in yield. It has been found that, taking one year with another, the earlier potatoes are planted in most places in Canada after the ground is dry enough to work and danger of very severe frosts are over, the larger the crop will be.

The following is given as a general rule of guidance for planting potatoes in Canada for highest yields. Where the spring is early and autumn frost early, plant early; where the spring is early and the summers dry, plant early; where the spring is late and autumn frost late, early planting is not so important; where the spring is late and the autumn frosts are early, plant as soon as soil is dry enough.

As an aid to lowness, Hindu women color their teeth black, while in Japan and China they paint their faces white with red on their cheeks and magenta on the lips.

In Order To Maintain Freedom of the World All Must Stand Together

No Danger From Comets

Even If One Struck the Earth It Would Not Harm Us.

From time to time the columns of the newspapers are enlivened with reports that the earth is in imminent danger of collision with a comet. Alarming rumors of this sort, it will be recalled, attended the last visit of Halley's comet, and now it is the Pons-Winnecke comet that is about to annihilate us.

Sensational announcements on this subject having been erroneously credited in the press to Greenwich Observatory, Dr. A. D. C. Crommelin of that institution takes occasion to deny them in the Journal of the British Astronomical Association.

As to the chances of collision between the nucleus of the comet and the earth, he says that the uncertainty of the comet's distance from the sun at nodal passage is quite small, and the chance is, therefore, one in nine thousand of a particular eight minutes (the earth's diameter). Next the comet's resolved velocity perpendicular to the ecliptic is about eight miles per second, which would mean one-half million to one the chance is, therefore, one in nine thousand of a particular eight minutes (the earth's diameter). Next the comet's resolved velocity perpendicular to the ecliptic is about eight miles per second, which would mean one-half million to one the chance is, therefore, one in nine thousand of a particular eight minutes (the earth's diameter).

World Happenings Briefly Told

Ford Motor Co. has started recall of single workers without dependents to its automobile plant at Detroit.

Final figures of the referendum commission put Toronto on the war side by a majority of 9,010.

A Cincinnati woman left the bulk of her estate to the U.S. Government to help pay off the war debt.

A Detroit judge permitted a prisoner to leave court to attend a funeral. He hasn't got back yet.

Welland, Ont., fears loss of early cherries by the recent severe cold weather.

In five years Chicago has had 1,144 murders, New York 1,121 and London, England 128.

Provision for protection of the Holy Sepulcher against fire has been made by Sir Herbert Samuel, high commissioner for Palestine, says the Palestine weekly.

C. A. Birrell, of Fort William, was appointed secretary of the Grain Inquiry Board at an informal meeting of members. He has arrived in Winnipeg.

Four men were fined \$200 and costs or thirty days in jail, and three others were remanded on charges of disorderly conduct arising out of the unemployed demonstration in Toronto.

Sir Edgar Walton, the high commissioner for South Africa, in an interview with the London Times, says General Smuts' government has got well into the saddle and already has done much to unite the people.

Keeps Baby's Skin Healthy

If every mother could only realize the danger which lurks in the neglect of chafing and skin irritations she would not take chances on being without Dr. Chase's Ointment to apply after baby's bath.

It arrests the development of pustules and makes the skin soft, smooth and velvety.

Buy a box, all dealers, or McNamee, Bates & Co., Ltd., Toronto.

To Begin Irrigation Work To Bring Water to 100,000 Acres in the Lethbridge District.

It is now planned that construction on additional irrigation works to bring water to 100,000 acres in the Lethbridge North irrigation district, will be started on the 1st May. The legislature of Alberta now in session has unanimously decided to guarantee the necessary finances. The large-farming area already under irrigation around Lethbridge has been very profitable. Bonds covering expenditure for the new irrigation area guaranteed by the province of Alberta will shortly be on the market.

THE FATEFUL YEARS FOR EVERY WOMAN

How to Overcome Troubles That Afflict Women Only.

So far as a woman's health is concerned, probably the most fatal years in her life are those between 45 and 50. Many women enter this period of decreasing vitality through overstrain in household cares, or a neglected condition of the blood, and so they suffer heavily.

Among the commonest symptoms at this time are headaches, pains in the back and sides, fever, flushed, palpitation, dizziness and depression.

It is well to know that these variations of health can be relieved by homoeopathic treatment. Dr. Williams' Pink Pills will do much to help women at this time. Among those who have found homeoboxes for \$2.50 from The Dr. Williams' Pink Pill Co., 100 King St., W., Rhonda, N.S., who says: "I was greatly troubled with nervousness, palpitation of the heart, dizziness, and a general debility. I took the pills only with difficulty, that I could do my work, and although I had been taking medicine for some time I did not improve. Finally a friend advised Dr. Williams' Pink Pills, and I took them. I am now well again. I have always used them, but especially will they help women at this time."

Among those who have found homeoboxes for \$2.50 from The Dr. Williams' Pink Pill Co., 100 King St., W., Rhonda, N.S., who says: "I was greatly troubled with nervousness, palpitation of the heart, dizziness, and a general debility. Finally a friend advised Dr. Williams' Pink Pills, and I took them. I am now well again. I have always used them, but especially will they help women at this time."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or you can get them by mail at 5¢ a box or six through the use of Dr. Williams' Medicine Co., Brockville, Ont.

London maintains a laundry school, where girls are taught the true art of washing clothes.

Minard's Liniment used by Physicians

An Ancient Spinner

Poland Claims to Have the Oldest Maid in Central Europe.

Poland claims the oldest spinner in Central Europe. She is Miss Anna Dobek, living in Chocholow, who recently celebrated her 123rd birthday.

Miss Dobek is still quite active, physically and mentally, and does some housework each day.

She also has a sense of humor, and to her acquaintances, attributes her longevity to the fact that she has never been bothered by having a man about the house. Miss Dobek doesn't like cats, either.

Every careful and observant mother knows what her child suffers from worms.

She also knows that if some remedy be not speedily applied much harm will result to the infant.

An excellent preparation for this purpose

is Carter's Little Liver Pills.

They act quickly, though gently and give nature a chance to renew your health.

Correct the important causes of constipation, colic, biliousness, indigestion and sick headache.

Keep Minard's Liniment in the house.

Eyelet Embroidery Is A Favored Trimming

By Marie Belmont.

One of the most interesting developments in the adorning of the new spring frocks and suits is the lavish use of eyelet embroidery. It is exceedingly effective, as it permits the use of contrasting fabrics which add much to the beauty of the models. This dress, cut from soft folds of satin, mon chiffon is partly veiled by elegant batiste. The latter richly embroidered with cyclists, is dispensed in panels on the front of the dress. The waistband of the garment is covered with the batiste which is cut in pointed-style. A huge sash of chiffon is bowed at the waistline, and the long ends become panels that are much longer than the front of the gown.

Among the Russian crown jewels, the whereabouts of which remain a mystery, is an emerald weighing six and three-quarter pounds.

Why suffer from cones when they can be painlessly rooted out by using Holloway's Corn Remover.

The first successful aerial photograph ever taken by the British was one of Neuve Chapelle, in 1914.

Catarrhal Diseases Cannot be Cured

By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Diseases, and that is to use Imperial Mica Axle Grease.

CATARRH MEDICINE acts through the blood on the Mucous Surfaces of the System. Catarrhal Diseases are due to a bad condition of the mucous lining of the East African and Indian Oceans. When this tube is affected, not only is there a rumbling in the imperial harness, and when it is entirely closed, Deafness is the result. The tube is then completely reduced and this tube restored to its normal condition, hearing may be destroyed forever.

ONE HUNDRED DOLLARS for any case of Catarrhal Disease that cannot be cured by the use of CATARRH MEDICINE.

All Drugs 75c. Circular free.

F. J. Cheney & Co., Toledo, Ohio.

New Creamery Plant Planned.

Several creamery and cold storage plants, construction of which was commenced last year, are to be completed as quickly as possible this summer by the Saskatchewan Co-operative Creameries. The new plants are at Yorkton, Weyburn and Melfort.

Lignite Coal In Western Canada.

The coal produced at the Lignite Utilization plant at Bisalta, Sask., will be placed on the Winnipeg market at \$11.50 per ton, according to a statement made recently in the Manitoba Legislative by Hon. T. H. Johnson, attorney-general. If all that is claimed for the brigadier manufactured at the Bisalta plant is correct, the price above quoted should revolutionize the coal trade of Winnipeg.

Direct wireless communication between England and Australia has been successfully effected on the Marconi principle. The distance covered is between 12,000 and 13,000 miles.

Keep Minard's Liniment in the house.

Prominent Western Man Praises Tanlac

G. W. Logan, Peabody, Kansas

"Tanlac has completely restored my back and I feel finer than in years," was the straightforward statement made recently by Mr. George W. Logan, of Peabody, Kansas, one of the most prominent stock-dealers in the Middle West.

"It has not only made a new man of me but I have actually gained forty-five pounds in weight and feel well. I even did my hill work. I am telling all of my friends about Tanlac but they can see for themselves what it has done in my case.

"When I began taking Tanlac I was away off in weight, felt weak and nervous all of the time and couldn't

take any interest in my work or anything else. My main trouble was indigestion. Tanlac seems to cure me. At times I would have dizzy spells and at other times my back would ache so bad that I could hardly get up and down in my chair. I am taking Tanlac in the same way in which I started to take this medicine. It took just six bottles to make a well man of me. I now have a fine appetite, everything tastes good and my digestion is perfect.

"My wife was also troubled with indigestion at times and it relieved her in the same way. You may publish my statement wherever you like and if anyone doubts it, just tell them to see me."

Big Sale of Timothy Seed.

Growers of Timothy seed in the Pincher Creek district, Alberta, have recently sold 500,000 pounds of seed to a Chicago firm. The price paid was from 5½ to 6½ cents per pound.

Some Yield

An acre of ground planted with bananas will, it is estimated, produce nearly 20 tons of fruit, as each bunch of bananas weighs from 70 to 80 pounds.

Satisfaction in both Cans

Imperial Mica Axle Grease contains just enough powdered mica to form a smooth, hard surface on the axle which relieves friction and enables grease to do its work better. It prevents hot boxes and scored axles, and outlasts other greases two to one.

Imperial Eureka Harness Oil penetrates every fibre of leather, thereby excluding moisture, dust and sweat. It preserves harness, and prevents cracking and breaking of stitches. Harness that is treated with it lasts for years, looks well all the time and requires little repairing.

Ask your nearest dealer about these two high quality products. He has both its convenient sizes.

ATLAS LUMBER Co'y. BUILD IT NOW

Reconstruct the Old Home For Longer Usefulness

Reconstruction begins at home. If the old house is still in good condition and a new one, a little of the right kind of repairing and remodeling will readily restore it to present day standards.

Perhaps it's a new porch, a summer kitchen, a side entrance, a new floor, extra rooms in the basement, a rearing of old, cracked walls and ceilings that is needed.

The right kind of lumber used in the right way will make the change and we have all the materials you will require including that knots and cracks are eliminated lumber Beaver Board, for better walls and ceilings.

Suppose you ask us about it?

ALL LUMBER REDUCED

"FLEXO"

What is there in a name? Nothing, if you don't know what it means.

With "Flexo" in your Automobile Tires you eliminate Blow-outs, Punctures and Leaky Valves, mending about and spoiling your clothes, with Flexo in your old Tires you can wear them down to the last fabric.

Think of it! your wife, daughter or lady friend can drive the car without fear of Tire trouble, when you use "Flexo".

LOCAL AND GENERAL

Mr. R. Chapman, of Cochrane, was a visitor in town last week-end and ably assisted in the Band as a cornet player during the Anniversary Service of the Oddfellow's.

The Red Deer District Meeting of the Alberta Conference will convene at Crossfield Union Church, Wednesday and Thursday, May 26th and 27th. Delegates will be present from Red Deer, Innisfail, Olds, Westdale, Carslair, Delburne, Elmo and Crossfield. The evening meetings will be public. The first night Dr. Hussey will preach, after which the Sacrament of the Lord's Supper will be administered. The second night Rev. G. D. Armstrong, of Red Deer will speak. The delegates will be billeted in the homes of the Crossfield people.

Dr. W. B. Price, V.S., B.V.Sc., Veterinary Surgeon, will visit the Crossfield Livery Barn every Monday afternoon.

At a meeting held at the close of the concert last Monday night, with Mr. Evans, manager of the Chautauqua circuit, Mr. S. Willis was appointed Chairman of the Crossfield Chautauqua. Mr. J. F. Peccival is Secretary, Mr. H. Scholefield in charge of advertising and Mr. M. Thomas of tickets. It was decided to address a letter to each of the U. F. A. locals seeking their active support in making the Chautauqua a success this year. It should be borne in mind that the Chautauqua is a district, not a town affair. The dates are June 7-8-9. Buy your season ticket and save money thereby, while at the same time supporting the undertaking.

A Diocesan Conference will take place at St. Paul's Hall, Calgary, on May 30th, 31st, and June 1st, when many questions pertaining to the welfare of the Church will come up for discussion. The Crossfield delegates are Messrs F. L. Watterson and Allen Montgomery, with Messrs I. Lewis and R. Whitfield Jun'r. as substitutes. Sunday, May 29th, will be observed an Diocesan Conference Sunday, when the preacher at the evening service in the Pro-Cathedral will be the Rev. J. P. Dingle, Rector of this Parish.

There was a record turn-out at the Oddfellow's Anniversary Service on Sunday last, at Union Church. The Rebekah's were also well represented. Crossfield District Band headed the procession to and from the Church, and are to be complimented on the progress made so far. Rev. Bro. R. K. Swanson conducted the service.

NOTICE TO SUBSCRIBERS TO WOMEN'S INSTITUTE LIBRARY

All subscribers are earnestly requested to take reasonable care of books borrowed. Some of the books lately have been so badly used that they will have to be withdrawn from circulation. The committees are now purchasing some new books, and they must be returned whole and clean, or the librarian is authorized to fine the borrower the cost of the book spoiled.

Learn to sing--Augustine Arlidge, Calgary's leading singing teacher visits Crossfield every Monday. Mr. Arlidge can teach you to sing, --many of Calgary's best singers are from the Arlidge Vocal Studio. Start now while you have this opportunity.

Hugh McLean wishes to announce that he has opened up the Cowling Barn, at the south end of town. Livestock and Feed at moderate charges. Your patronage is solicited.
